The DACS is the Department of Defense Software Information Clearinghouse. The DACS is sponsored by the Defense Technical Information Center (DTIC) through the Information Analysis Center (IAC) Program.

The DACS serves as a gateway to software technology information by providing access to WWW resources, publishing technical reports, hosting seminars, publishing the *Software Tech News* newsletter, presenting courses, and performing technical studies for patrons of the Center.

For Additional Information on the DoD DACS' Products & Services contact:

Anne Robinson
DACS Customer Liaison
Telephone • (315) 334–4905
Fax • (315) 334–4964/4965
E-mail • cust-liasn@dacs.dtic.mil

A World of Information Available from the DoD Data & Analysis Center for Software

DoD Data & Analysis Center for Software

DoD DACS WWW Site

Finding the best software engineering resources on the Internet in a timely, economical manner has just become easier. The DACS Web site and anonymous FTP site use modern Internet standards to provide easy access to the information you need.

The DACS Web site provides critical and timely information to the RDT&E and Information Technology Researcher, Program Manager, Acquisition Manager, Technologists, and Software Developer on topics of interest to the DoD community.

We do not just provide links to sites and then expect you to go discover the information yourself. We've gone to the sites, prequalified the information, organized the information, and have provided direct links for you to the information you need in an unbiased fashion.

The common theme of this web site is to provide information and expertise to our users to improve personal productivity, improve organizational productivity, improve product quality and reliability, reduce development and rework costs, and utilize best practices.

A World of Useful Information

Through our site, users are able to access the following information:

❖ In excess of 125,000 bibliographic citations and abstracts with 6,000-10,000 entries added each month

❖ State of the Art Reports and Other Technical Reports from the DACS and Other Sources

❖ Education, Training and Course Information

❖ Software Technology Standards

❖ In excess of 20 Topics of Interest that have been researched by the DACS for the Best Information on the Web

❖ COTS Software

❖ Repositories of Technology Information

❖ Anonymous FTP Site (ftp.dacs.dtic.mil/pub)

❖ Much More

Topics of Interest on the DoD DACS WWW Site:

❖ **Cleanroom Software Engineering**

❖ **Client/Server Architecture**

❖ **Computer Aided Software Engineering (CASE)**

❖ **Cost Estimation**

❖ **Data Mining & Warehousing**

❖ **Formal Methods**

❖ **Inspections**

❖ **Intranets**

❖ **Measurements**

❖ **Client/Server Architecture**

❖ **Object Oriented Technologies**

❖ **Plans, Policies & Standards**

❖ **Rapid Prototyping & Requirements Engineering**

❖ **Reuse of Software Assets**

❖ **Intranets**

❖ **Software Process Improvement**

❖ **Year 2000 Solutions**

❖ **Others...**
